ART UNIT

PAPER NUMBER

2153

DATE MAILED: 05/22/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/042,668	<b>Applicant(s)</b> VINCENT, CHRISTOPHER R.	
	<b>Examiner</b> Yasin M. Barqadle	<b>Art Unit</b> 2153	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 02 March 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-39 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-39 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

### **Response to Amendment**

1. The amendment filed on August 23, 2005 has been fully considered but are moot in view of the new ground(s) of rejection.

- Claims 1-39 are presented for examination.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4, 15, and 28-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Svoboda (U.S. Patent number 6,597,771, hereinafter Svoboda”). Svoboda discloses a method of

Art Unit: 2153

a message modification in a communication system and a device for performing the method.

Svoboda shows,

In referring to claims 1, 2, 15 and 28, 29, Svoboda shows accepting a correction to a message previously sent to recipient device (received message are analyzed and the sender is allowed to modify the sent message (col. 2, lines 2-44); and determining whether a message correction of the previously sent message requires sending one of a complete corrected message and a message correction specification; and based on the determination of message correction of the previously sent message, sending to an instant message manager on a messaging server one of a complete corrected message and a message correction specification. (Svoboda col. 17-27 and col. 2, lines 5-62) “After receiving a message, the message being delivered into a receiver communication unit through data communication means and stored in a storage unit, there is a password allocated to the sender, the password being allocated with respect to available information about an identity of the sender, and the password is delivered back to the transmitter communication unit as acknowledgement message and serves the sender as a key for obtaining an access to functions for modification and/or deleting a message stored in a communication unit of the receiver.” (Svoboda, col. 1, lines 57-67. see also col. 3, lines 5-26) a system that allows a user to correct a previously sent message and analyzes received messages inherently implies managing and controlling identified message to be corrected. Svoboda teaches an electronic-mail system, “there are systems working in such a manner, that a created message, an electronic document, is by means of a computerized system, operating as data communication means, transmitted at first to a server of a provider of the connection and then to a mail server of an

Art Unit: 2153

addressee. The electronic message shall be stored in the mail server, until it is withdrawn by the addressee.” Col. 1, lines 17-27 and col. 2, lines 49-60.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-6, 9-12, 18,21,24,25,32-33,36,36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maurille (U.S. Patent Number 6,484,196, hereinafter “Maurille” in view of Svoboda.

In referring to claims 5-6, 9-12, 18,21,24,25,32-33,36,36-38, Maurille shows substantial features of the claimed invention including an instant messaging system: “In particular, the present invention is a communication board system with multiple modes in which the communication board system can be variously configured as: a threaded instant message system (conversation history plus instant access capabilities)” (col. 2, lines 56-61), a messaging server (server 100), coupled to client 150, fig. 1, message id (message ID in table 142), retrieving message from conversation log (col. 6, lines 44-57 and col. 8, lines 21-66), activating an alert to notify a user on an update (col. 12, lines 3-23). However, Maurille does not show accepting a correction to a previously sent message. Nonetheless this feature is well known in the art and would have been

Art Unit: 2153

an obvious modification to the system disclosed by Maurille as evidenced by Svoboda. In analogous art, Svoboda discloses a method of a message modification in a communication system and a device for performing the method. Svoboda shows accepting a correction to a previously sent message and sending to a messaging server one of a complete corrected message and a message correction specification: (The communication unit of the addressee analyses the received message and the modification system according to the invention allows the sender to demand completion and/or modification of the message (col. 2, lines 2-44) "Svoboda teaches an electronic-mail system, "The mail server receives previously sent message and perform analysis of the received message to determine if its parameters are unsatisfactory or different from desired ones." Col. 2, lines 54 to col. 3, line13.

In referring to claims to claims 12 and 39 Maurille shows displaying highlighted text in a conversation log and an auditory alert (col. 12, lines 20-30 and col. 13, lines 12-28)

4. Claims 3-4, 7-8, 10, 13-14, 16-17-19-20,22-23,26-27, 30-31, 34-35 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Svoboda and Maurille and further in view of Rayson et al. (U.S. Patent Number 5761689, hereinafter "Rayson").

In referring to claims 3-4, 7-8, 13-14, 16-17-19-20,22-23,26-27,30-31 and 34-35, Although Svoboda shows substantial features of the claimed invention, Svoboda does not show a text replacement specification comprising a start character index; an end character index; and

Art Unit: 2153

insertion text: Nonetheless this feature is well known in the art and would have been an obvious modification to the system disclosed by Svoboda as evidenced by Rayson.

In analogous art, Rayson discloses a method a method of autocorrecting text typed into a document. Rayson shows: "a text replacement specification comprising a start character index; an end character index; and insertion text: (Rayson, col. 5, lines 39-58 and col. 10, lines 14-54. See also fig. 3-5). Given these teachings, a person of ordinary skill in the art would have readily recognized the desirability and advantages of modifying the system of Svoboda so as to replace and modify errors in a textual data at any position of a document.

Claims 10 and 37 Svoboda in view of Maurille and Rayson show the determining step comprises determining whether at least one factor of the following corresponds to a system: language translation; correction of binary format information in a message; correction of image information in a message; system processing efficiency; network communication efficiency (Rayson col. 2, lines 66 to col. 3, line 5 and col. 8, lines 41-67).

### **Conclusion**

5. The prior made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yasin Barqadle whose telephone number is 571-272-3947. The examiner can normally be reached on 9:00 AM to 5:30 PM.

Art Unit: 2153

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Burgess can be reached on 571-272-3949. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either private PAIR or public PAIR system. Status information for unpublished applications is available through private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
